ASCS Today

By Tom Conrad
Agricultural Conservation Program - ASCS encourages farmers to correct their most critical conservation problems and where needed, assist them with the cost of installing these practices.

Farmers who have been approved for conservation practices are asked to report the completed practices as soon as possible. Payments will be issued promptly. If the approved practice cannot be completed for some reason farmers should notify ASCS immediately so that the funds may be allocated to necessary practices on another farm.

ACP requests will be reviewed at a meeting on July 27. Funds are limited and I advise farmers who have not signed up to do so in the near future.

The ACP is designed to encourage farmers to voluntarily perform soil and water conservation measures. It authorizes funds to help those who could not or would not perform such practices to the extent necessary without some federal assistance.

We have an obligation to protect soil and water resources for the benefit of farmers and the public, and the ACP endeavors to meet this obligation.
